Self - Assessment**

		 	  
<b>Procedural Writing</b> My piece of procedural writing has a set of instructions to make the space garden with at least five plants and a watering system I have designed.			
The text is broken into steps.			
There is a logical sequence.			
I have used the present tense.			
I have tried not to use personal pronouns (I, me etc).			
<b>Technology</b> I have drawn a plan which shows what I imagined my space garden with at least five named plants and watering system to look like.			
I have used recycled materials to make my space garden with at least five named plants and watering system.			
I prepared a plan of action for the making of my space garden with at least five named plants and watering system.			
I identified and collected the materials I needed to make my space garden with at least five named plants and watering system.			
I have presented my plans and design to make a space garden with at least five named plants and watering system.			
My space garden with at least five named plants and watering system is no more than 1 cubic metre.			
I made sure that my space garden with at least five named plants and watering system can be transported to and from school easily.			
I have identified when I needed assistance from an adult and what they helped me with.			
I have identified modifications made to my original plan and stated why these modifications were necessary.
